

GE Intelligent Platforms and  
Gexpro Present

## Advanced QuickPanel View Hands-on Workshop

The QuickPanel View bundled visualization solution family provides many advanced tools not typically found on HMI touch-screen products. In conjunction with GE's Proficy View – Machine Edition, users are able to meet demanding requirements in applications typically solved using PC's and SCADA software.

You are invited to attend an instructor-led and hands-on experience demonstrating how to use the advanced and powerful features of the QuickPanel View. The presentation focus and labs will be centered on communications, advanced graphic features and data logging.

Attendees have the option to use their own laptop for lab sessions or one supplied by Gexpro. Proficy Machine Edition Software and Proficy Historian will be installed at the beginning of the session if needed.

The 1/2-day session is offered in the morning and repeated in the afternoon. If you are attending either session, you are welcome to join us for lunch.

### Workshop Agenda

- 8:00-8:30** Morning Session Software Installation **if needed** on personal PC, Breakfast snacks provided
- 8:30-12:00** Advanced Communications, Graphics and Data Logging Sessions Including Hands-on Labs
- 12:00 – 1:00** Lunch
- 12:30 – 1:00** Afternoon Session Software Installation **if needed** on personal PC
- 1:00 – 4:30** Advanced Communications, Graphics and Data Logging Sessions Including Hands-on Labs

### Free Proficy Historian Software

A free 25-point Proficy Historian will be provided to each attendee for use in the hands-on lab and to take home.
