

Gexpro Automation Solutions presents
Fall 2010 Seminar Series
Baton Rouge - New Orleans

Machine Edition Logic Developer PLC Maintenance & Troubleshooting Seminar

This seminar is a general introduction to GE Intelligent Platforms' Proficy Machine Edition Logic Developer PLC software, and how to use it in maintenance and troubleshooting applications. A few of the topics in this seminar include connecting to the target, downloading and uploading, using the fault tables, dynamic cross reference table, forcing I/O, and the data monitor tool.

- Four Dates to Choose:**
