

## Gexpro Industry Solutions Spotlight – Online Seminar

### Waveform Correction Technology for the Water/Wastewater Industry Presented by Environmental Potentials

**Thursday, March 15, 2012 | 1:00 – 2:00pm EDT**

Join us for this industry focused solutions spotlight, Waveform Correction Technology for the Water/Wastewater Industry.

Reliability in the power system is more than an utility concern. Reliability also comes from within the facility. Learn more about using Environmental Potentials' patented waveform correction technology on critical electrical loads in water/wastewater applications.

This seminar is ideal for design and specifying engineers, equipment manufacturers, and water/wastewater facility engineers and technicians.

#### **System Requirements**

PC-based attendees – Required: Windows® 7, Vista, XP or 2003 Server

Macintosh®-based attendees – Required: Mac OS® X 10.5 or newer

Free to attend, registration is required to receive logon information. Scan this QR code, or go to:
